

Meet the Manager Q&A High Wycombe Station –17 February 2016

Question/Comment	Response
<p>The salt being put down on plat one ruins the stitching on my leather shoes.</p>	<p>We try to minimise the amount of de-icing chemicals we use, but unfortunately at this time of year, some treatments are required to keep the station safe.</p>
<p>It's a long walk along platform one to get to platform three.</p>	<p>With High Wycombe station's offset platform layout, the walk is hard to reduce. The new footbridge will be as long a walk as at present, but will have a roof, so it will at least provide some shelter.</p>
<p>Can we have a canopy extension to the new bridge?</p>	<p>We have created as much covered space as we can, however, there will be a short part of the walk between platforms that isn't covered.</p>
<p>Cars are driving the wrong way in the car park.</p>	<p>This has been made worse recently by the bridge works closing off parts of the car park. We will review the situation once the works are completed.</p>
